

Supplemental Visual Comparison

U.S. Design Patent No. D1,127,429 S ("Chair") — Patented Design vs. Reported Products

Patent Owner: Ziel Home Furnishing Technology Co., Ltd. (Shenzhen Stock Exchange: 301376)

Commercial Embodiment: VASAGLE EKHO bar stool, sold on Amazon.com under ASIN B0CM3CNBGY

Submitted by: Tairan Wang, USPTO Reg. No. 67,961, PV IP PC — authorized agent of the patent owner

In support of Report Infringement submission — reported ASINs: B0G9RBRXFC, B0G9S8VLGK, B0G9SLH88Z, B0G9SP4B3S, B0G9T4D2J7, B0G9TQ545F

1. The Patented Design and Its Commercial Embodiment

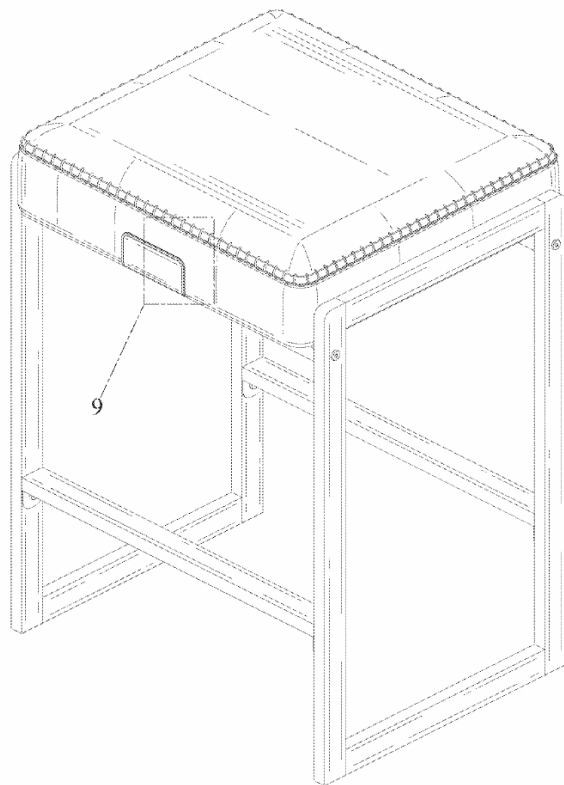

FIG. 1

D1,127,429 S — FIG. 1 (perspective view)

The patent claims the ornamental design for a chair as shown in nine drawing views.

The patented design is commercially embodied in the VASAGLE EKHO Collection bar stool, offered on Amazon.com under the VASAGLE brand (U.S. TM Reg. No. 5,696,193, owned by the patent owner's authorized licensee, AMEZIEL INC.) under ASIN B0CM3CNBGY.

The EKHO listing was cited during examination, and the patent was granted over it as the inventor's own prior disclosure within the one-year grace period of 35 U.S.C. § 102(b)(1). The EKHO stool is the commercial embodiment of the claimed design.

Reviewers may therefore compare the reported listings directly against both the patent drawings and the EKHO listing (B0CM3CNBGY).

2. Overall Visual Appearance — Substantially the Same

Patented Design (FIG. 1)

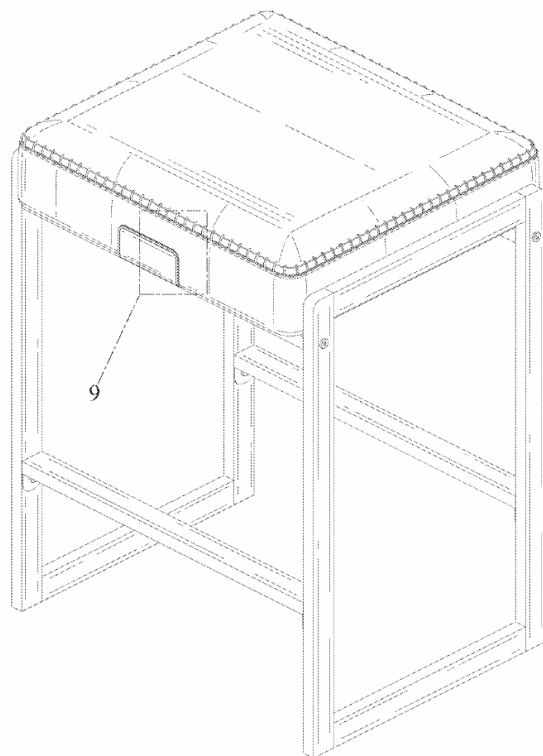

FIG. 1

Reported Listing B0G9SP4B3S (Amazon product image)

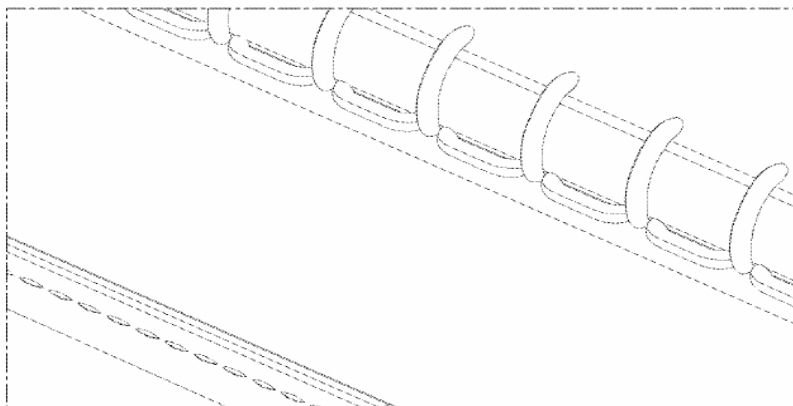

Shared design elements

- Decorative contrast whip-stitch trim encircling the upper seat edge — the signature element of the claimed design
- Boxy upholstered seat with rounded corners seated over an open metal frame
- Straight square-tube legs; backless counter-height silhouette and proportions
- Exposed circular fasteners at the upper frame corners

3. The Signature Whip-Stitch Trim — Detail Comparison

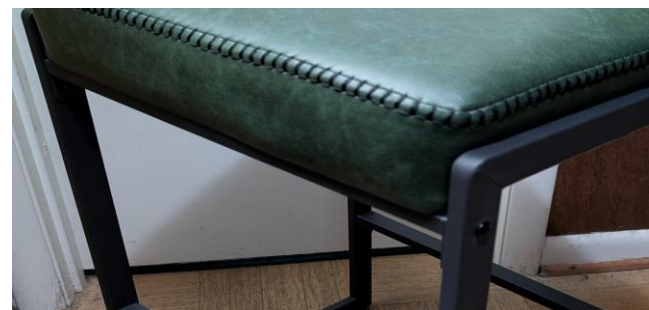

Patented Design (FIG. 9, enlarged detail of seat-edge trim)

Reported Listing (Amazon product image)

Physical sample (purchased and examined)

The reported product reproduces the distinctive whip-stitch trim in contrasting thread along the entire upper seat edge — the most visually prominent element of the claimed design. The listing itself advertises this element as "Refined Stitching."

4. View-by-View Correspondence

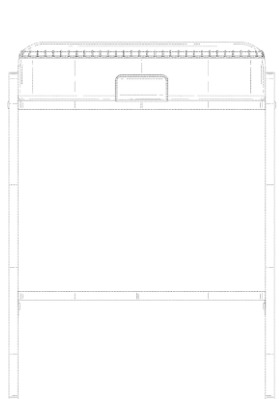

FIG. 3

FIG. 3 (front) ↔ front view

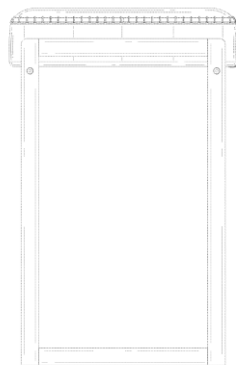

FIG. 5

FIG. 5 (side) ↔ side view

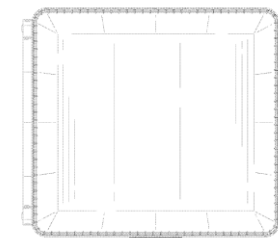

FIG. 7

FIG. 7 (top plan) ↔ top view

In each corresponding view, the reported product presents the same overall configuration: the stitched upholstered seat overhanging an open rectangular frame, the same seat-to-frame proportions, and the same square-tube structural vocabulary. (Product views: photographs of the physical sample of ASIN B0G9SP4B3S, purchased on Amazon.com and examined; its appearance is consistent with the listing images.)

Note: a design patent protects the ornamental design shown in the drawings irrespective of color. The six reported ASINs are the same product design offered in three colorways and two set sizes; the comparison above applies equally to all six.

5. Conclusion

In the eye of an ordinary observer, giving such attention as a purchaser usually gives, the design of the reported products is substantially the same as the patented design: the resemblance is such as to deceive an ordinary observer, inducing the purchase of the reported products supposing them to be the patented design embodied in the VASAGLE EKHO stool.

The patent owner respectfully requests removal of the reported listings:
